Landrover Experience Adventure Day

Following a request from Maj. Phil Packer www.philpacker.com Xplorability Training Manager Paul Sinkinson arranged with the World famous Landrover Experience Centre at Eastnor Castle, UK, to sponsor a 4wd Adventure Day on behalf the Help for Heroes.

With Paul and his Xplorability colleagues being tied up with 4wd Training in France and North Africa, Graham Raphael of Motorsport Endeavour and his Team who are UK based, kindly took on the task of co-ordinating the event with Landrover Experience New Market Manager John Lloyd and LRE Eastnor Events Organiser Jo Willson.

The Adventure Day took place in mid August and was attended by a number of the Heroes who all drove enthusiastically over the exciting mixed terrain on the LRE course.

Lynx Hand Control Systems

Neil Gummery and his Lynx Team also helped to sponsor the event and supplied and installed their brilliant Hand Control Systems to the Landrover Vehicles. They then gave instructions on their use. In a very short space of time everything was ready and all the drivers were very impressed.

The Adventure Drive

The fantastic Team of LRE Instructors put all the drivers through their paces and both the drivers and their respective instructors were amazed just how controllable the Landrover vehicles were when being used with the Lynx Hand Control System.

Drivers experienced driving on steep ascents and descents, slippery side slopes, mud, rocky terrain and deep water sections.

The standard of instruction combined with the wonderful Landrover “Terrain Response” system ensured that all the drivers were fully confident throughout.

The smiles say it all
